NOTES

1. CAD MODEL FILENAME, 872-LM8670 V Block Location Identifier A
2. SCRAP ALUMINUM MATERIAL IS FINE IF THERE ARE NO THIN SECTIONS THAT MIGHT COMPROMISE STIFFNESS
3. REMOVE BURRS AND SHARP EDGES

|                                                                                                                                                                                                                                                                                                                |        |                                                                                       |                                          |          |              |                                        |     |  |  |
